

Operational Readiness Report:

Urgent referral back to KFSHRC emergency

Section 1: Scenario Demographics

Scenario Title: External Transfer for Acute Cholangitis Management

Target Learning Group:

- Duty Managers
- Registration Staff
- Inpatient Nursing (Building 20)
- Inpatient Physicians (On-call/Admitting)
- EMS
- Laboratory and Pharmacy Staff

Approximate Timing:

Phase	Duration
Set-Up	30 min
Scenario	60 min
Debriefing	20 min

Section 2: Scenario Developers

Stakeholders:

- B20 Hospital Operations

Section 2: Curriculum Integration

Educational Goal: To validate the operational readiness, workflow efficiency, and system interoperability for an urgent external patient transfer involving a surgical/medical patient with biliary pathology during admission in B20 Inpatient unit.

Section 3: Scenario Script

Scenario Cast:

- **Patient:** Standardized Patient presenting with symptoms of Cholecystitis/Cholangitis.
- **Confederates:** Actual B20 staff performing their professionally assigned roles
+ One assigned Auditor + KFHSRC ED Team leader (Simulated)

Required Systems & Equipment:

- Siratech (HIS): For registration, encounter management, and clinical documentation.
- EMS: Ambulance, personnel and dispatch system
- Vital signs monitor.

Section 4: Patient Data and Baseline State

Clinical Vignette: The patient is a 35-year-old admitted in AMH after initial transfer from KFSH (General Surgery Department) as a subacute patient for management of Acute Cholecystitis. The patient presents with severe Right Upper Quadrant (RUQ) pain radiating to the right shoulder and nausea and diminished oral intake. Physical examination reveals slight scleral icterus (jaundice). Upon arrival at Almathar in-patient unit, the patient is vitally stable. later, the patient will become visibly distressed, febrile, and tachycardic, mandating a referral to KFSH Emergency for urgent ERCP.

Patient Profile:

- **Diagnosis:** Acute Cholecystitis > Acute Cholangitis.
- **Therapy:** NPO status, IV Fluids, IV Antibiotics, Analgesia.
- **Weight:** 50kg.

Baseline State:

- **Blood Pressure:** 120/80 mmHg.
- **Heart Rate:** 90 bpm
- **Respiratory Rate:** 14 breaths/min.
- **Temperature:** 37.5°C
- **O₂ Saturation:** 96% on room air.

After deteriorating Vital Signs:

- **Blood Pressure:** 90/59 mmHg.
- **Heart Rate:** 120 bpm (Tachycardia).
- **Respiratory Rate:** 20 breaths/min.
- **Temperature:** 38.5°C (Fever).
- **O₂ Saturation:** 96% on room air.

Section 5: Supporting Documents & System Verification

- **Laboratory Orders:** Order LFTs and CBC. **Expected Findings for Simulation:** should show elevated LFT and Bilirubin and high WBC.
- **Image: Expected Findings for Simulation:** repeated US showed dilated CBD.
- **Pharmacy Orders:** Order Ceftriaxone 1g IV and Ketorolac (Toradol) 30mg IV to test the pharmacy dispensing workflow and delivery time for urgent infectious/pain management.
- **Data Integrity:** Perform a cross-check to ensure the physical ID armband printed matches the Siratech master record for the inpatient encounter. And transfer documents including medical reports

Color Legend:

	Almather Hospital Action
	Patient Services Action
	EMS Action
	Both Teams / Joint Action
	Decision Point
	Alert / Important Note

C.2 REVERSE TRANSFER: ALMATHER HOSPITAL → KFSHRC**A. URGENT / EMERGENCY**

STEP	OWNER	ACTION	TIMELINE
◆	TRIGGER: Patient condition exceeds Almather Hospital clinical capability		
▼			
1	MRP/DELEGATE	Calls both the admitting service at KFSHRC and the DEM Referral On-Call (B1 Physician) to inform them of the patient's clinical deterioration and the need for emergency transfer	Immediate
▼			
2	AMH NURSE	Calls EMS dispatch to arrange patient pick-up, providing pick-up time and relevant clinical data	Immediate
◆	Steps 1 and 2 occur in parallel		
▼			
3	EMS	Picks up the patient from Almather Hospital and transfers to the KFSHRC Emergency Department	As dispatched
▼			
4	KFSHRC EMERGENCY DEPT	Assumes care of the patient upon arrival and informs the admitting service to initiate the admission process	Upon arrival
▼			
5	ADMITTING TEAM	Assumes care of the patient once admitted	Post-admission

Simulated MRN: 10000380

To book all related ambulance transfers:

Primary number: 0500073809

Back up number: 0537002357

Simulated DEM Referral On-Call (B1 Physician) > 44554

Simulated DEM Charge Nurse > 41449
